Mark Jezreel Martinez

SOFTWARE DEVELOPER

ABOUT ME

EXPERIENCED PROFESSIONAL WITH A PASSION FOR TECHNOLOGY AND A PROVEN TRACK RECORD IN SOFTWARE DEVELOPMENT

Experience

Optimind Technology Solutions

PHP Developer - March 2023 to March 2025

- Developing and maintaining WordPress, WooCommerce, and web applications for local and international clients. Building backend services for mobile applications, collaborating with teams to deliver tailored solutions, and ensuring client satisfaction. Additionally, applying foundational cybersecurity practices, including securing web applications, implementing basic data protection strategies, and configuring web application firewalls (WAF) to mitigate common threats like SQL Injection and XSS. Focused on delivering secure, scalable, and high-performance solutions.

City Government of Valenzuela - Information and Communications Technology Office (ICTO)

Computer Programmer - March 26 2025 (Current)

- Responsible for designing, developing, and maintaining secure APIs to enable third-party systems to interact with government services under strict access control and security protocols. Leads the redevelopment and modernization of legacy government systems by upgrading outdated SQL databases and re-engineering applications built on obsolete programming languages. Also tasked with maintaining and supporting legacy systems critical to city operations, ensuring system stability, data integrity, and continuity of services. Collaborates with internal departments to deliver scalable, secure, and efficient digital solutions aligned with the evolving needs of the local government.
